Straddle leg

Adjustable straddle leg design, suitable for diverse pallet sizes and more stability.

Easy Assembly

Multi position straddle allows for easy assembly, multiple pallet widths and excellent stability.

For every application the right battery capacity

The right battery:
35/40PSW 24 volt 270 AH battery standard.

Maintenance friendly

The trucks design and component placement allow for easy service and maintenance. Two screws are used to hold cover in place allowing fast and easy access to all components. Drive wheel and caster can be removed and replaced without use of additional lifting devices.

Built-in USB-connector

USB-connector for charging of additional devices during warehouse operations.

CAN-BUS

CAN-BUS technology

Can-Bus technology allows for fewer wires and increased dependability. Can-Bus technology allows for easier adjustments and troubleshooting reducing downtime. New digital display outperforms analog.

ZAPI Controller

ZAPI Controller and Battery Indicator with hour meter as well as fault code display for easy maintenance.

Electronic proportional lifting and lowering

The electronically controlled proportional lifting system ensures accurate positioning and stacking operations at every lifting height.

Proportional lifting increases productivity especially at higher lift heights.

Long tiller design for ergonomics and safety

Long tiller design keeps operator at a safe distance while providing an ergonomic hand position.

Reduced force to the operator allows for easy and ergonomic control of the operation of the truck.

Handle operating heights are varied allowing for comfortable and efficient use of multiple operators.

Mesh protection

Mesh protection for safety as well as great visibility during operation. Strong design with no reflection or scratches from Plexiglass.

Easy maintenance

Easy maintenance or replacement of the drive wheel after long term use.

ZF drive technology

The powerful Schabmuller maintenance free AC Drive motor in combination with the ZF gearbox, Intorq brake and Rader Vogle drive wheel gives best performance, efficiency and reliability to reduce operating costs!

Whether smooth or fast acceleration is applied, the AC Drive always gives the right and direct response.

Robust and reliable design

The robust chassis with the strong 0.3in thick apron protects the truck and the components against mechanical impacts from the outside.

In combination with the metal battery cover, the truck is well-equipped to keep damages to a minimum.

Dirty floor environments have less influence to the vertical AC motor design as the components and the brake are out of the reach of direct impacts.

IP54 protected controller, safe from dust or rain.

HYUNDAI FORKLIFTS

DELIVERING MORE SO YOU CAN DO MORE.

As an organization committed to innovation, quality, and customer service, Hyundai has grown into one of the world's largest industrial manufacturers. When it comes to material handling, Hyundai offers a comprehensive lineup of reliable, durable, and technologically leading equipment. Our PSW Straddle-leg Walkie Electric Stackers are part of our complete line of Class III forklifts—each engineered to bring you greater dependability, lower cost of ownership, and the value and performance you need to increase your productivity and your profits.
