MORE INNOVATIONS. MORE PERFORMANCE. SO YOU CAN DO MORE AND SAVE MORE.

피

Get more of what you're looking for: **THE BC-9U FROM HYUNDAI**

The BC-9U Series offers significant performance improvements that can drive up productivity as it drives down costs. With its advanced controller, energy consumption has been reduced by 16%. Mast working speeds have been increased by 6% so you can move more pallets per hour. Turning radius has been reduced by 4.4 inches. Add in compatibility with Li-ion batteries, outstanding safety features, advanced diagnostics, and simplified maintenance, and you have a forklift engineered to deliver years of service and savings.

So, if you're looking for a forklift that delivers more for less, take a look at the BC-9U.

MULTIFUNCTION CLUSTER OPTIMIZES PERFORMANCE

This advanced digital system clearly displays essential operational information in real time. It also includes buttons for easy setting of travel speed and most operating speeds to match work conditions. You'll find innovations everywhere:

- Onboard diagnostics, data logging, safety features, and maintenance tracking keep operators and technicians informed
- Speed, direction and operating hours are clearly shown
- · Load weight indicator with overload warning system

HIGH-PERFORMANCE LITHIUM-ION BATTERY

The optional Li-ion battery offers rapid charging in just 2 hours and opportunity charging that eliminates the need to swap batteries at shift changes, all while delivering outstanding performance, lower costs, and no daily maintenance, plus:

- Savings on your energy bills, more uptime, and reduced infrastructure costs
- Plug-and-play integration delivers charge level and low battery warning alerts directly to the diaital cluster

RUGGED, ENERGY-EFFICIENT **DEDICATED DRIVE AXLE**

The unique design of this dedicated drive axle for the single drive motor offers low resistance and reduced noise generation. The result? Dramatically improved energy efficiency and the lowest level of driving noise in its class for lower operating costs with enhanced operator comfort. It also includes a wet disc brake for reduced maintenance and greater reliability.

FULL SUSPENSION GRAMMER SEAT

suspension seat is adjustable to the

operator's body weight, with adjustable

armrests and lumbar support to reduce

strain on the operator as well as fatigue.

Enhanced operator comfort leads to

safer operation of the forklift.

increased efficiency, productivity, and

Industry-renowned Grammer full

OPERATOR COMPARTMENT

The BC-9U offers operators areater comfort and convenience that translates into greater productivity. There's outstanding visibility, more legroom, and the steering wheel has been reduced by 1.6" to improve handling and reduce fatigue. Options include fingertip controls and a forward/reverse switch and horn button mounted on the lift lever

- cluster
- The Operator Presence Sensing System (OPSS) prevents driving, lifting, and tilting when the operator leaves the seat
- The optional seatbelt interlock requires the operator to wear the seatbelt for the forklift to operate
- Maximum travel speed can be set to assure greater safety
- With the BC-9U cluster, engine status and issues can be checked without the need for a separate diagnostic tool

ERGONOMICALLY FOCUSED

SIMPLIFIED MAINTENANCE THAT SAVES TIME & MONEY

The BC-9U includes an array of innovations for faster and easier servicing. The hub and steering wheel design makes it simple to replace the wheel simply by unfastening six nuts. There is ready access to key components, such as the battery and controller. And the Curtis controller features a self-diagnostic function to monitor and check for malfunctions.

The BC-9U Series brings you even more advantages.

- Load weight indicator offers real-time data on the weight of the load and an overload warning through the digital
- The safety lamp system includes bright, long-life LED work lamps and direction indicators with optional beacon, blue spotlights, and red zone lamps for added safety
- Password setting feature helps to prevent unauthorized use
- Enhanced battery safety with a bottom cover to prevent battery acid leaks from damaging the equipment and an adjustable stopper to secure different size batteries in place
- Curtis Controller with a unique cooling system for greater reliability and power system failure self-diagnostics

HI-MATE MANAGEMENT SYSTEM

Hi-Mate is simply the industry's best remote management system. With continuous data collection, Hi-Mate delivers more communication, control, and ability to track, monitor, maintain, and manage your forklift fleet. It is the proven way to coordinate both your equipment and human resources.

ONLY HYUNDAI OFFERS YOU SUCH A COMPREHENSIVE, FULLY INTEGRATED TELEMATICS SYSTEM.

Data collected at the sensors and modules mounted on equipment during the operation of forklift truck at the operation control system of Hyundai Industrial Vehicle is provided to the mobile device or computer of the customer in real time through the server of Hyundai Construction Equipment. Such visual data can be used for establishing a control plan for safety control in fields, productivity improvement, and cost saving.

Equipment operation management

Real-time monitoring and follow-up management of individual vehicles, drivers, equipment on-site, and operation information

• Key-on time, travel hours, work hours, and traveling position
