HYUNDAI

MATERIAL HANDLING

NO ONE DELIVERS MORE

MORE PRODUCTIVITY.
MORE INNOVATIONS.
EVERYTHING YOU NEED
TO DO MORE FOR LESS.

Get more of what you're looking for: THE B-X SERIES FROM HYUNDAI

The B-X Series brings forklift owners a new level of performance, convenience, and value. At the heart of the B-X Series is a design that dramatically reduces energy consumption to cut the cost of ownership. But throughout these rugged machines are innovative features that improve reliability, simplify servicing, enhance safety, and offer a level of operator comfort unsurpassed in the industry.

Greater durability. Improved stability. Superior ergonomics. The new B-X Series is engineered to raise the productivity of your entire operation as it saves you money — shift after shift, year after year.

DEEP DROP DESIGN IMPROVES VEHICLE STABILITY

In this design, the battery is located between the front and rear wheels creating a low center of gravity and acting as a balancing element enhancing driving safety and stability especially when handling elevated loads. Other safety features include:

- Anti-rollback system
- Operator Presence Sensing System (OPSS)
- Optional travel speed limiter
- Customizable maximum travel speed settings

MULTIFUNCTION CLUSTER OPTIMIZES PERFORMANCE

This advanced digital system clearly displays essential operational information in real time. It also includes buttons for easy setting of travel speed and most operating speeds to match work conditions. You'll find innovations everywhere:

- Onboard diagnostics, data logging, safety features, and maintenance tracking keep operators and technicians informed
- Speed, direction and operating hours are clearly shown
- Load weight indicator with overload warning system

RUGGED, ENERGY-EFFICIENT DEDICATED DRIVE AXLE

The unique design of this dedicated drive axle for the single drive motor offers low resistance and reduced noise generation. The result? Dramatically improved energy efficiency and the lowest level of driving noise in its class for lower operating costs with enhanced operator comfort. It also includes a wet disc brake for reduced maintenance and greater reliability.

ERGONOMICALLY FOCUSED OPERATOR COMPARTMENT

The operator compartment has been ergonomically engineered to reduce operator fatigue while enhancing productivity. The seat is ideally positioned for precise control of the steer handle and pedals, with maximum visibility to the cluster and the work environment. The steer handle itself has been reduced by over 1.5" for simpler, smoother operation.

HIGH-PERFORMANCE LITHIUM-ION BATTERY

The optional Li-ion battery features rapid charging in just 2 hours and delivers outstanding performance with a lower cost of ownership. It requires no daily maintenance and eliminates the need to swap batteries at shift changes. Highly efficient, Li-ion batteries offer up to 15% savings on electric bills, while delivering fast lifting and travel speeds.

HiMATE

HI-MATE MANAGEMENT SYSTEM

Hi-Mate is one of the industry's most advanced remote management system. With continuous data collection, Hi-Mate delivers more communication, control, and ability to track, monitor, maintain, and manage your forklift fleet. It is the proven way to efficiently coordinate both your equipment and human resources.

The B-X Series brings you even more advantages.

- Optional auto-tilting feature stops forks at a position parallel to the ground enhancing safety and efficiency when loading and unloading pallets from racks at high elevations
- Optional rear grip bar with horn allows the driver to maintain a stable, convenient posture during rear driving
- LED headlamp, rear work lamp, and combination lamp provide higher visibility than conventional lamps and offers semi-permanent service life
- State-of-the-art hydraulic control system matches the output of the hydraulic motor to the action required delivering greater reliability with minimal maintenance
- Optional A/C and heater deliver improved cooling and heating performance
- Anti-rollback system stops the machine from rolling back while stopped on inclines
- OPSS restricts driving, lifting, and tilting whenever the operator leaves the driver's seat
- Password setting system protects the machine from unsupervised use and theft
- Optional seatbelt interlock stops the forklift if the seatbelt is not fastened
- Curtis Controller with a unique cooling system for greater reliability and power system failure self-diagnostics
- Simplified side battery replacement & convenient battery charging
